

ENDLESS AND ROCKWILL BRING COMPUTERS THAT SOLVE COST AND CONNECTIVITY TO EAST AFRICA

New partnership will deliver Endless Computers powered by green energy to rural areas in East Africa

NAIROBI, Kenya - October 6th, 2017 - Endless Solutions Inc., a San Francisco based company that develops technology solutions for digital inclusion, has united forces with Rockwill Green Energy East Africa Limited to deliver renewable energy powered computers to Kenya and the East African region.

Endless computers will now be added to Rockwill Green Energy East Africa solar energy products and services portfolio.

Endless computers come preloaded with the Endless Operating System developed to solve the problems of cost and connectivity that have left more than [half of the world's population](#) excluded from the digital revolution. "We are delighted to partner with Rockwill Green Energy to make this technology available for Africa together with a clean energy solution," says Michael Hill, Endless Director of Business Development for Africa. "Endless comes with a complete ecosystem of preinstalled applications for school, work, home and play, allowing for information and educational tools to be delivered to everyone."

In the background, Endless OS infrastructure was built to optimize data consumption during updates and internet navigation, while all other computer systems in the market were built assuming all users have high quality broadband connectivity.

"Our partnership with Endless shall be of great value addition to our portfolio. They offer a tech solution that will go far into helping the productivity of individuals and institutions that rely very much on technology", says Tonny Mutuku, CEO for Rockwill Green Energy East Africa Limited. "Africa as a continent is embracing technology gradually, but internet access is a huge stumbling block to this achievement. Endless has now come over to bridge this massive gap. The impact from this shall be felt far and wide."

Endless OS has been tried and tested in remote areas of Brazil, Guatemala, Haiti and many other countries with huge positive impact. It was designed to be simple and easy to use with an interface very similar to a smartphone, with everything easily organized into apps. It comes preloaded with more than 150 apps, offering engaging content and powerful tools to individuals, families, schools, and other groups in regions where internet access may be unreliable. In the background, it will automatically install software updates and retrieve fresh content for apps whenever there is a connection. When a user has internet, Endless OS works like any other computer system with the full benefit of browsing the internet.

Endless preloaded content includes a full encyclopedia with articles from Wikipedia, fun educational games for kids, and tons of information on health, well-being, recipes, parenting, and nearly any other topic of interest. The system also includes tools for creating documents, spreadsheets, and business presentations, editing videos and photos, creating 3D prototypes, listening to music, and much more.

About Endless

Endless was founded in 2012 with the mission to make computing universally accessible for everyone. Endless OS, the company's flagship product, is a fully functional operating system that is easy to use and comes pre-installed with more than 150 apps. The company is based in San Francisco and has offices in Rio de Janeiro, Mexico City, Guatemala, Taipei and London. Its team of advisors includes Nobel Prize Winner Muhammad Yunus, and Nicholas Negroponte from the MIT Media Lab.

About Rockwill

Rockwill Green Energy East Africa Limited is the premier provider of renewable energy solutions ranging from Individual Home Owners, Institutions, and Grid Connected power plants. We address the customers' energy need by offering customized products for a specific client, considering that energy need varies from client to the other. We are currently working with Rural Electrification Authority of Kenya to help them achieve their mandate of connecting the rural areas with electricity. We are also working on a 20MW Solar Power Plant as a joint venture with our partners in China.
